

The logo for 'ACEs Connection Webinars' is centered at the top. 'ACEs' is in a light blue sans-serif font, 'Connection' is in a darker blue sans-serif font, and 'Webinars' is in a black cursive script. The background is a blurred image of a laptop and a coffee cup. A green horizontal line with circular markers passes through the text.

ACEs Connection Webinars

Teaching trauma-informed practices to students & residents in health care fields

Moderator: Laurie Udesky is an award-winning health and science reporter whose work has appeared in many news and magazine outlets, including The New York Times, the Los Angeles Times and salon.com. She is a staff reporter for ACEs Connection and the community manager for ACEs in Pediatrics.

The logo for 'ACES Connection Webinars' is centered at the top. 'ACES' is in a large, black, sans-serif font. 'Connection' is in a smaller, black, sans-serif font below it. 'Webinars' is written in a large, black, cursive script font below 'Connection'. The background of the top banner is a light blue image of a laptop keyboard and a white mug. A thin green horizontal line with small green dots at the ends runs across the banner.

ACES Connection Webinars

Teaching trauma-informed practices to students and residents in health care fields

- How do you teach students in health care fields about the nuances of providing care to patients who have experienced trauma?
- How can students learn how to interact appropriately with patients who have experienced trauma and build trust?
- How does roleplaying with a peer mentor better prepare students in health care fields for caring for patients with trauma?

**Share resources
and best practices
in pediatrics.**

**Address ACEs in
children and their
parents and
caregivers.**

May 10: SAMHSA Hosts Town Hall on Helping Children Who Experience Trauma

JANE STEVENS · 14 HOURS AGO

Nearly half of the nation's youth report having experienced at least one traumatic event. The Substance Abuse and Mental Health Services Administration's (SAMHSA) National Children's Mental Health Awareness Day 2018 event in Washington, DC, will feature an interactive town hall on strategies to create an integrated health approach to support children, youth, and young adults who have experienced trauma. Awareness Day 2018: "Partnering for Health and Hope Following Trauma," will take place on...

New organization calls all pediatricians to end crisis that's "hiding in plain sight"

Laurie Udesky · 2 DAYS AGO

When the question of screening patients for adverse childhood experiences (ACEs) was first raised a couple of years ago, Santa Barbara pediatrician Andria Ruth had mixed feelings about it.

About

As part of the company's philanthropic commitment to address childhood adversity, **The Resilience Effect**, Genentech is supporting reporting and community management for the ACEs in Pediatrics community. The goal of the Resilience Effect is to support leading thinkers across clinical and community settings to design, test and scale the most effective ways to address childhood trauma.

By reporting on developments in the broader pediatric community, highlighting innovative practices, and providing a place for members of the pediatric community to share their stories and information, this site will help accelerate the integration of ACEs science into the pediatric community.

Can anyone recommend a TIC training for primary care sites in the U.S.? The NCBH has continued its offering of a collaborative, now lasting 16 months, but we're outside of Kaiser Permanente's catchment area. Specifically, I'd like a curriculum that includes in-person trainings.

Hi,

Great question. We are actually doing an in-person training on TIC in primary care Sept 28. I have attached our flyer. Please let me know if you have any questions.

Dana

ACEs Connection Webinars

Panelist: Andrew Seaman is an assistant professor of medicine at Oregon Health & Science University. He is board certified in internal medicine and in addiction medicine. He is an educator and has taught medical residents about the implementation of trauma-informed care practices, and he serves as a healthcare-for-the-homeless clinician at Central City Concern's Old Town Clinic in Portland. His specific research interests include the intersection of Hepatitis C and injection drug use, medication –assisted therapy for opioid use disorders in incarcerated populations and the implementation of trauma-informed care practices into healthcare systems.

ACEs Connection Webinars

Panelist: O'Nesha Cochran works with the Mental Health Association of Oregon as a Certified Recovery Mentor at Oregon Health & Science University. As a peer, she assists addicts with complicated health issues from bedside as inpatients until they transition to the community. She then supports their enrollment into treatment and/or teaches them harm reduction skills when applicable. Cochran received her certificate in Addictions Counseling in 2015, and her Associate of Applied Science degree from Portland Community College in 2016. She will finish a Bachelors of Social Work degree from Portland State University in June 2018. She has trained medical residents and has been involved in training local providers through the project ECHO Tele-health Care Program. She trains peer mentors and has presented at several health care conferences.

The logo for 'ACEs Connection Webinars' is centered in the top banner. 'ACEs' is in a dark blue sans-serif font, 'Connection' is in a lighter blue sans-serif font, and 'Webinars' is in a black script font. A thin green horizontal line with small green dots at the ends passes behind the text. The background of the banner shows a blurred image of a laptop keyboard and a white mug.
