

# UNITE CALIFORNIA

Building healthier communities together.

## What is a coordinated care network?

A coordinated care network is a group of health and social care providers connected through Unite Us' shared technology platform to work together in real time to support the complex needs of local individuals and families. The network contains partners who provide a broad range of services such as housing, employment, food assistance, behavioral health, utilities, and more. The network also creates a community-wide data set to better understand the needs of community members and gaps in service availability to address those needs.

## Network partners can:

- Easily refer and connect their clients to local services they need in the community.
- Improve their clients' health and wellbeing through strengthened collaboration with partners offering a wide array of services.
- Track the outcomes of all referrals and services delivered for their clients.
- Measure the impact of their organization and the services they deliver.
- Improve organizational capacity through accurate referrals and access to a wealth of data on local service delivery.

## How does it work?

Network partners can include community-based organizations (CBOs), safety net health care providers, health systems, insurers, and other key partners looking to better support people to achieve healthy outcomes. Network partners can choose to participate in whatever way works best for them and can change how they participate in the network over time. Our HIPAA-compliant platform allows partners to connect their clients with community resources while tracking the status and progress of their clients' referrals and the outcomes of the services provided, creating an accountable system of care that puts the community first.
